

## **Initial Placement**

Once an evaluation is complete and it is determined your child has a specific disability, you must sign a placement statement in order for your child to begin receiving special education and related services.

If you have any concerns about the evaluation process, an independent evaluation may be required. If you have any concerns about the nature or procedure of the evaluation, please call the Exceptional Student Services office at (520) 696-8836.

### **Input from others**

You may bring anyone with you to attend your child's IEP team meeting. IEP teams are required to consider information provided by an outside source. The team is not required to implement findings or follow recommendations, but should have all the information available in order to implement the best program for your child.
